OBJECTIVE

Motivated B.Tech IT student with hands-on experience in full-stack web development, frontend engineering, DSA, and cloud computing. Seeking a software engineering internship or new grad role to apply problem-solving skills, contribute to scalable systems, and grow as a software engineer.

EDUCATION

G L Bajaj Institute of Management & Research

Sep 2024 – Jul 2028

B.Tech in Information Technology

Relevant Coursework: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS

S D Memorial Senior Secondary School

Passout: 2024

Senior Secondary (PCM) – Physics, Chemistry, Mathematics

EXPERIENCE

Skill Craft Technology

2024 – Present

Frontend Developer Intern

- Developed responsive, mobile-first UI components using **React.js**, HTML5, and CSS3, improving cross-device user experience.
- Collaborated with backend teams to integrate RESTful APIs and deliver seamless frontend-backend communication for production features.
- Participated in code reviews and agile sprints, contributing to a scalable and maintainable frontend codebase.

GirlScript Summer of Code (GSSoC)

2024

Open Source Contributor

- Contributed to open-source projects by fixing bugs, improving UI components, and writing documentation across multiple repositories.
- Collaborated with maintainers and contributors globally, following best practices in Git workflows, pull requests, and code reviews.

PROJECTS

UPSC News Hub – Full-Stack Web Application

2024 – Present

- Designed and developed a responsive full-stack web app using **React.js** (frontend) and **Flask** (backend), demonstrating end-to-end engineering capability.
- Implemented **RESTful API** architecture for seamless frontend-backend communication, applying software design principles for scalability.
- Built mobile-first, responsive UI components using CSS and JavaScript, improving UX across multiple device form factors.

DSA Problem Solving Practice – Java, Algorithms, Data Structures

2024 – Present

- Solved algorithmic problems on arrays, linked lists, trees, and recursion, strengthening core CS fundamentals for technical interviews.
- Applied **OOP principles** (inheritance, encapsulation, polymorphism) and analysed time/space complexity (Big-O) to build efficient Java programs.

SKILLS

Languages: Java, Python, C, JavaScript, HTML5, CSS3

Frameworks/Libraries: React.js

Tools & Platforms: Git, GitHub, VS Code, AWS (Cloud Foundations)

Core Concepts: DSA, OOP, Recursion, REST APIs, Responsive Web Design, Frontend Development

Cloud & Security: AWS Cloud Foundations, Cybersecurity Fundamentals

CERTIFICATIONS

AWS Academy Graduate – Cloud Foundations | Amazon Web Services

2024

- Foundational knowledge of AWS cloud services: compute, storage, networking, databases, and cloud security best practices.

Cybersecurity Foundation | Industry Certification

2024

- Core cybersecurity concepts including threat modelling, network security, and data protection principles.
